

Muhammad Bilal  
Nawaz

Personal details

- Muhammad Bilal Nawaz
- Bilalqureshi87@yahoo.com
- +92 345 5313 073
- House 262/1 Mohalla Phuldar,  
Sector 4 KTS,  
22800 Haripur
- 25 December 1986
- Haripur
- yes
- Male
- Pakistani
- Married

Skills

- Pipefitting
- Structural fabrication
- Welding techniques
- Engineering drawing interpretation
- Safety compliance

Education

**Matriculation** Mar 2000 - Aug 2002  
Abbotabad Board Pakistan, Haripur  
Completed Matriculation with a focus on Arts subjects under the Abbotabad Board.

Employment

**Pipefitter** May 2024 - Present  
Siemens, Rawalpindi  
Working as a Pipefitter at Siemens in Rawalpindi, responsible for assembling, installing, and maintaining piping systems for industrial and mechanical operations.

**Structure Fabricator** Feb 2023 - Feb 2024  
MCDERMOTT, QFAB, Ras Laffan, Qatar  
Worked as a Structure Fabricator for Qatargas through McDermott at QFAB yard in Ras Laffan, Qatar. Involved in the fabrication of offshore structural components including jackets, decks, and modules. Responsibilities included reading and interpreting engineering drawings, cutting and assembling steel structures, fitting and tack welding, and ensuring precise alignment as per Qatargas specifications. Maintained high safety and quality standards while coordinating with QA/QC teams to meet project deadlines.

**Structure Fabricator** Nov 2015 - Feb 2023  
MCDERMOTT, Dubai  
Worked as a Structure Fabricator for ARAMCO projects through McDermott in Dubai from November 2015 to February 2023. Involved in the fabrication of offshore and onshore steel structures such as jackets, topsides, and modules. Key responsibilities included interpreting ARAMCO-approved drawings, cutting and assembling steel components, fitting structural parts, and maintaining dimensional accuracy as per ARAMCO standards. Proficient in using fabrication tools and equipment, while ensuring strict adherence to HSE and quality procedures. Played a critical role in meeting client specifications and maintaining high productivity and safety benchmarks throughout project execution.

**Pipe fabricator** Jan 2015 - Jun 2015  
Abdullah Al Barak, Damam  
Worked as a Pipe Fabricator at Abdullah Al Barak in Dammam, Saudi Arabia. Responsible for measuring, cutting, and assembling pipes according to engineering drawings and specifications. Skilled in using fabrication tools such as pipe cutters, grinders, and welding equipment. Ensured accurate fit-up, alignment, and quality of piping systems for industrial projects.

**Pipe fabricator** Oct 2013 - Jun 2014  
TOPAZ Oil & Gas, Fujairah  
Worked as a Pipe Fabricator at TOPAZ Oil & Gas in Fujairah, UAE. Responsible for fabricating and assembling piping systems for offshore and onshore oil & gas applications. Key duties included reading and interpreting isometric and spool drawings, cutting and preparing pipes, performing fit-up and tack welding, and verifying dimensional accuracy. Ensured all fabrication work complied with project specifications and HSE standards. Collaborated closely with welders, foremen, and QA/QC teams to maintain quality and meet tight project schedules.

# Hobbies

- DIY projects
- Reading technical manuals
- Handcrafting

## Pipe fabricator

Mar 2012 - Mar 2013

DESCON, Ras Laffan

Worked as a Pipe Fabricator for QatarGas through DESCON at Ras Laffan, Qatar. Responsibilities included fabricating and fitting piping systems for oil & gas operations according to QatarGas specifications and engineering drawings. Performed pipe cutting, beveling, fit-up, and tack welding of various pipe sizes and materials. Ensured dimensional accuracy, alignment, and adherence to HSE and quality standards. Collaborated with welders, supervisors, and QA/QC teams to meet project deadlines and support shutdown and maintenance activities.

## Pipe fabricator

Dec 2007 - Nov 2011

Gulf Piping, Abu Dhabi

Worked as a Pipe Fabricator at Gulf Piping in Abu Dhabi, focused on the onshore fabrication of land-based drilling rigs. Responsibilities included reading and interpreting fabrication drawings, preparing and assembling high-pressure piping systems, and fitting pipe spools for mud systems, manifolds, and rig skids. Ensured precision in cutting, beveling, and alignment for welding operations. Maintained quality and dimensional accuracy according to project specifications and client standards. Collaborated closely with welders, supervisors, and QA/QC teams to meet project timelines while upholding safety and production standards.

## Pipe fitter

Oct 2006 - Oct 2007

Siemens, Rawalpindi

Worked as a Pipe Fitter at Siemens in Rawalpindi, responsible for installing, assembling, and maintaining piping systems for mechanical and industrial applications. Tasks included reading and interpreting piping layouts and isometric drawings, cutting and fitting pipes, and performing alignment and support installations. Ensured proper sealing and pressure testing of pipelines. Followed safety protocols and quality standards while coordinating with engineers and site supervisors to ensure project completion on schedule.

# Courses

## Mechanical Diploma 2 Years

Mar 2006

Completed a 2-year Mechanical Diploma program focused on industrial machinery, piping systems, fabrication techniques, and mechanical maintenance. Gained hands-on training in blueprint reading, machine tools, welding fundamentals, and workshop safety procedures. Developed strong technical skills in mechanical assembly, fitting, and troubleshooting, preparing for roles in construction, manufacturing, and oil & gas industries.

## Basic Rigging and Slings

Aug 2022

Completed Basic Rigging and Slings training under ABS Group in August 2022. The course covered essential rigging principles, safe lifting practices, inspection of lifting gear, load weight estimation, sling angle calculations, and hand signal communication. Gained practical knowledge on using shackles, hooks, wire ropes, and chain slings while adhering to international safety standards and lifting procedures.
